# Owners' Financial Report and Maintenance Fee Review

## Strata Plan 2324 | 2026 Year-End Review and 2027 Budget Projection

Prepared for circulation to registered proprietors ahead of the Extraordinary General Meeting. This report is the companion to the statutory filing made with the Commission of Strata Corporations of Jamaica. All figures are stated in Jamaican Dollars (JMD).

Prepared July 2026 | For the year ending December 2027

Prepared by Strata Management, Villaggio Del Sol Strata Plan 2324

## 1. Executive Summary

This report is issued to owners in advance of the extraordinary meeting called to consider an adjustment to the monthly maintenance contribution. It should be read alongside the 2026 Expenditure Report and the 2027 Estimated Expenditure Report, both of which are being filed with the Commission of Strata Corporations as required by law, and both of which are reproduced in full in the appendix to this report.

**The position is straightforward.** In 2026 the Strata spent **$4,789,702** to operate and secure the property. Across sixteen units, that amounts to **$299,356 per unit for the year, or $24,946 per unit per month.** Owners were billed **$20,000 per month.** The Strata therefore operated at a deliberate deficit of **$4,946 per unit per month, totalling $949,702 across the community for the year.** That gap was absorbed rather than passed on, because the committee was reluctant to burden owners with an increase while it continued working to contain costs.

That approach has now reached its limit. The 2027 projection places total expenditure at **$5,235,169**, or **$27,267 per unit per month**, a 9.3% increase driven almost entirely by contracted labour and security. Continuing to under-collect is no longer financially or legally sustainable. The Strata has no meaningful reserve remaining to draw on, and a corporation that cannot meet its obligations exposes every owner to liability.

**Recommendation.** The committee proposes a maintenance fee of **$30,000 per unit per month** with effect from January 2027. This covers the projected operating requirement of $27,267 and directs the remaining **$2,734 per unit per month, or $524,831 annually,** to a formally designated reserve and contingency fund. It would be the first such fund the Strata has held.

| $4.79M | $5.24M | +9.3% | $949,702 |
|---|---|---|---|
| 2026 TOTAL EXPENDITURE | 2027 PROJECTED EXPENDITURE | YEAR-OVER-YEAR INCREASE | 2026 FUNDING SHORTFALL |

## 2. What It Actually Costs to Run Villaggio Del Sol

The chart below compares the true cost of operating the property with the amount owners were actually billed. The 2026 bars tell the story of the past year: a real cost of $24,946 met by a contribution of $20,000. The 2027 bars show the correction now being proposed.

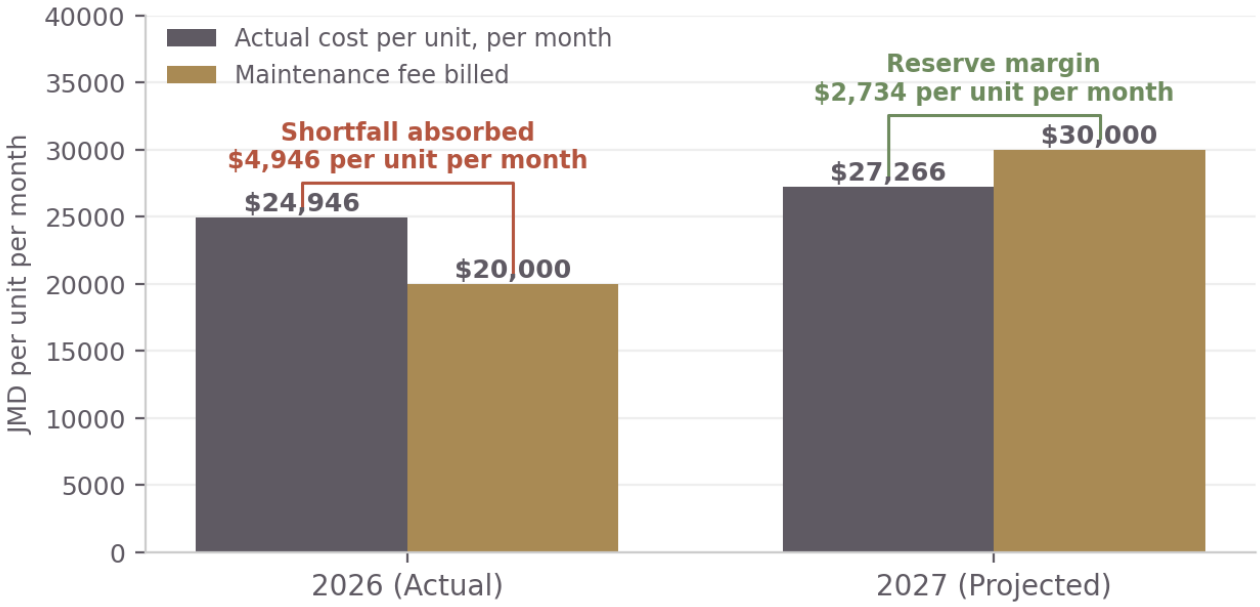

*Figure 1. True operating cost per unit compared with the maintenance fee billed, 2026 actual and 2027 projected.*

| | 2026 Actual | 2027 Projected | Change |
|---|---|---|---|
| Total expenditure | $4,789,702 | $5,235,169 | +9.3% |
| Cost per unit, annual | $299,356 | $327,198 | +$27,842 |
| Cost per unit, monthly | $24,946 | $27,267 | +$2,320 |
| Maintenance fee billed or proposed | $20,000 | $30,000 | +$10,000 |
| Monthly position per unit | ($4,946) deficit | $2,734 surplus | n/a |
| **Annual community position** | **($949,702)** | **$524,831 to reserve** | **n/a** |

**The essential point is this.** The move from $20,000 to $30,000 does not represent a $10,000 increase in cost. Roughly half of it simply catches up to expenses the Strata was already incurring and quietly absorbing on owners' behalf. The genuine year-over-year increase in cost is $2,320 per unit per month.

## 3. Where the Money Goes

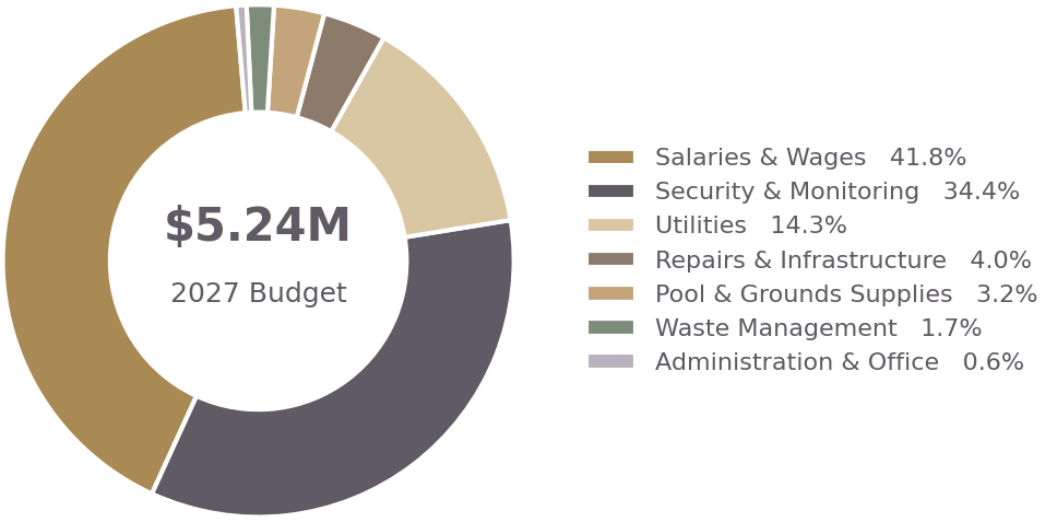

*Figure 2. Composition of the 2027 projected budget by expenditure category.*

**Salaries and security together account for 76.2% of the entire 2027 budget.** This is the defining feature of the Villaggio Del Sol cost structure, and it is the reason savings on discretionary items alone cannot close the gap. Manned security, electronic monitoring, gate infrastructure and grounds staffing are the services owners consistently identify as central to the value of a gated community. They are also contracted, wage-driven costs that rise with the labour market rather than with our own consumption.

Every category in this report groups only items that genuinely belong together, and each grouping is listed below so owners can see exactly what sits inside it. Nothing is combined for convenience alone.

| Category | What it contains |
|---|---|
| Salaries & Wages | Administration, ground-duties staffing, and the year-end bonus. |
| Security & Monitoring | Armour manned guarding and Hawkeye electronic monitoring, plus the security phone and battery-repair lines that first appear as separate items in 2027. These four are grouped together because all four are security services; see the note under Figure 3 for how the two new 2027 lines affect the year-over-year comparison. |
| Utilities | Electricity, water, telephone, and internet for common property. |
| Repairs & Infrastructure | Gate repairs, whipper repairs, pool repairs, generator battery and fuel, and general building and grounds repairs. Gate repairs sits here, with the other physical repair and infrastructure items, rather than under security, since it is maintenance work rather than a guarding or monitoring service. |
| Pool & Grounds Supplies | Pool chemicals and chlorine, plant chemicals, bleach, lawn oil, and mower and whipper fuel. |
| Waste Management | Garbage bags and the garbage collection service. |
| Administration & Office | Stationery, office supplies, and the post office box rental. |

## 4. Category Analysis: 2026 Compared with 2027

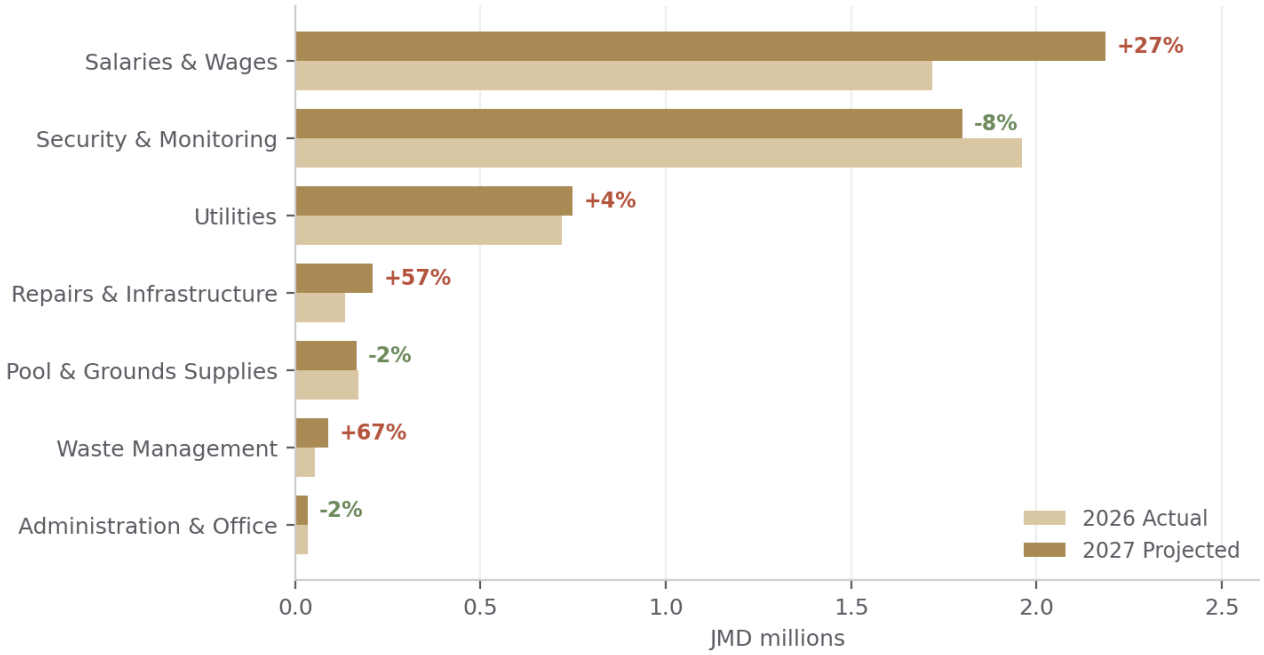

*Figure 3. Expenditure by category, 2026 actual compared with the 2027 projection, showing percentage change.*

### What the movements tell us

- **Salaries and wages rise by $468,800, or 27.3%.** This is the single largest driver and effectively accounts for the whole of the increase. Ground duties move from $1.44M to $1.82M as staffing is regularised and rates are brought to market, administration rises to $303,000, and the year-end bonus doubles to $60,000. These are people costs, and they cannot be reduced without reducing service.
- **Security and monitoring falls by $160,655, or 8.2%, at the category level.** Within that category, the two contracted services that exist in both years, Armour and Hawkeye, fell by $184,400, a reduction of 9.4%, driven by renegotiation of the Armour contract. The category-level figure of 8.2% is smaller only because $23,745 of new administrative security cost, the security phone and battery-repair lines, appears for the first time in 2027 with no 2026 comparator. Both figures are genuine; they simply answer slightly different questions, and both are shown here so owners can see the management achievement clearly: the guarding and monitoring contracts owners pay for every year cost 9.4% less in 2027.
- **Repairs and infrastructure rises by $76,425, or 57.3%.** Gate repairs alone accounts for $71,078 of that increase, moving from $8,922 to $80,000. This is deferred work being caught up rather than new discretionary spending, and it is the reason this category, taken as a whole, appears to rise sharply even though pool repairs and generator costs moved only modestly.
- **Waste management rises by $36,000, or 66.7%.** Both collection frequency and bag costs increased during the year. The line is small in absolute terms, but the movement is steep.
- **Utilities rise by only 4.0%.** Electricity, the largest single utility at $566,290, is effectively flat year over year, which indicates that consumption discipline is holding.

## 5. Monthly Cash Flow and the Subsidy Gap

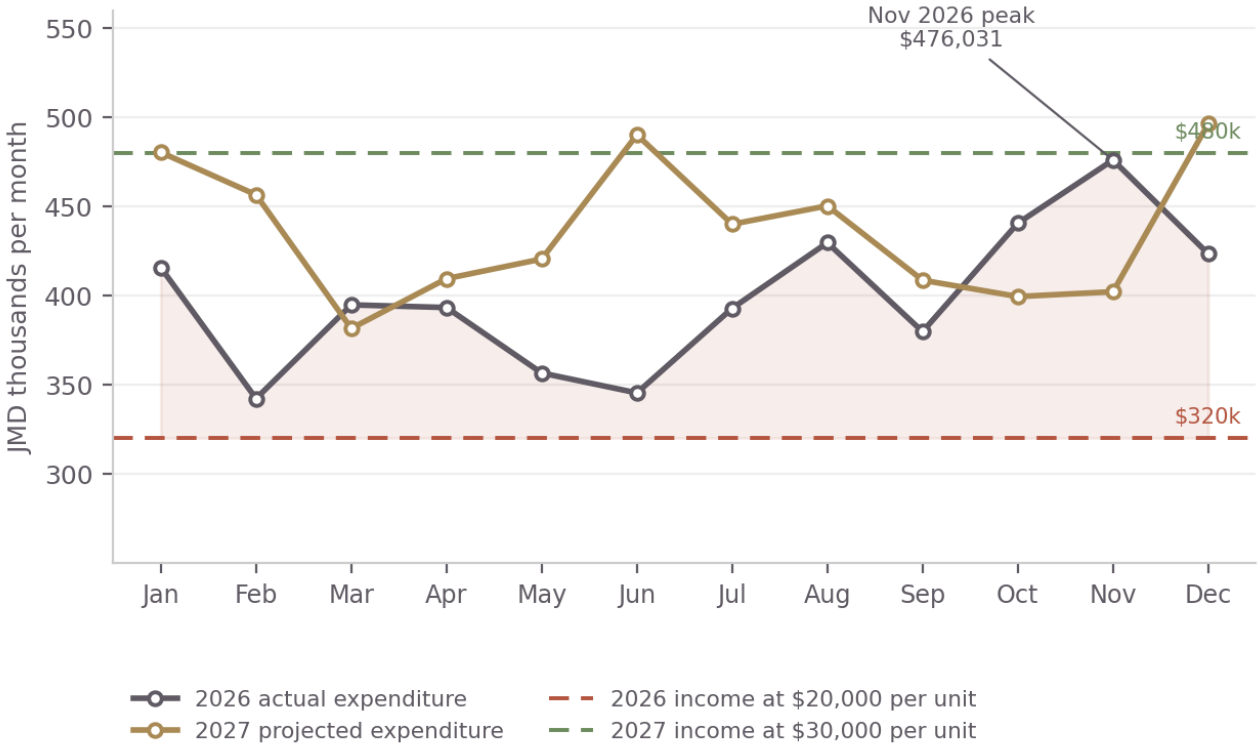

*Figure 4. Monthly expenditure measured against maintenance income. The shaded area between the 2026 line and the red income line represents the shortfall absorbed on owners' behalf.*

**In 2026, expenditure exceeded income in every single month of the year.** The gap was widest in November, when $476,031 of expenditure was met by $320,000 of income, and narrowest in February, but at no point did it close. Under the proposed 2027 fee, income of $480,000 per month covers projected expenditure in nine months out of twelve. Three months run over, namely January at $480,325, June at $490,180, and December at $496,361, and the excess in those months would be met from the accumulated reserve, which is precisely the purpose a reserve serves. Across the full year, income of $5,760,000 exceeds projected expenditure of $5,235,169 by $524,831.

## 6. The Case for $30,000 Rather Than $27,267

Setting the fee at exactly the projected operating cost of $27,267 would leave the Strata in the same fragile position it has occupied for the past two years: fully committed, with nothing set aside. Every unbudgeted event, whether a failed pump, storm damage, a generator replacement or an insurance excess, would then require a special assessment on owners at short notice. Special assessments are the most disruptive and least popular instrument available to a strata corporation, and they are almost always avoidable through modest and consistent reserve funding.

| Allocation of the proposed $30,000 monthly contribution | Per unit, monthly | Community, annual | Share |
|---|---|---|---|
| Projected operating expenditure | $27,267 | $5,235,169 | 90.9% |
| Reserve and contingency fund | $2,734 | $524,831 | 9.1% |

| Allocation of the proposed $30,000 monthly contribution | Per unit, monthly | Community, annual | Share |
|---|---|---|---|
| **Total** | **$30,000** | **$5,760,000** | **100%** |

A reserve allocation of 9.1% is conservative by any professional standard, as common practice for a property of this age and amenity profile is between 10% and 15%. The property comprises sixteen units across four two-storey blocks, together with a shared pool, gazebo, landscaped grounds, perimeter security and a standby generator. The roof tiles, pool shell, generator and gate motors are all long-life assets that will eventually require capital replacement, and at present none of them are funded.

## 7. Risks of Deferring the Increase

- **Depleted reserves.** The 2026 shortfall of $949,702 was met from accumulated funds and from the prudent deferral of non-urgent work. No comparable cushion is available for 2027, and a further year of under-collection would leave the Strata unable to meet its contracted obligations.
- **Contractual exposure.** Security and grounds services are contracted commitments. Late payment risks the suspension of manned guarding, which would be an unacceptable outcome for a gated community and a likely trigger for consequences to both insurance cover and property values.
- **Deferred maintenance compounds.** The pool and gate lines in the 2027 budget already reflect work postponed from previous years. Deferral converts routine maintenance into capital repair, typically at three to five times the original cost.
- **Statutory duty.** Under the Registration (Strata Titles) Act, the corporation is obliged to levy contributions sufficient to meet its actual and expected expenditure. Knowingly levying below cost is not a position the committee can responsibly maintain.

## 8. Recommendation and Next Steps

The committee recommends that owners approve a monthly maintenance contribution of **$30,000 per unit with effect from 1 January 2027**, with the surplus above operating cost ring-fenced in a designated reserve and contingency account and reported on at each general meeting. The committee further recommends that the Strata adopt a standing practice of reviewing the contribution annually against the filed projection, so that owners are never again asked to absorb a correction of this size in a single step.

Owners are asked to review this report together with the two underlying expenditure statements, reproduced in full in the appendix, and to attend the extraordinary general meeting at which the resolution will be put to a vote. Questions raised in advance of the meeting are welcomed and encouraged.

**In summary:** the committee held the fee at $20,000 for as long as it responsibly could, absorbing $949,702 on owners' behalf in 2026 alone. The 2027 projection of $27,267 per unit per month now requires a correction, and a fee of $30,000 both restores solvency and builds the first reserve fund this community has ever held.

Prepared by Strata Management, Villaggio Del Sol Strata Plan 2324. Figures are drawn from the 2026 Expenditure Report (twelve months, actual) and the 2027 Estimated Expenditure Report (twelve months, projected), both reproduced in the appendix. The 2027 figures are estimates and remain subject to contract renewal, utility tariffs and inflation. This document is provided for the information of owners and does not constitute legal or investment advice.

# Appendix

## Appendix A: Reconciliation and Corrections Log

This log records every correction and clarification identified while preparing this report, so that owners and the committee can see exactly what was checked, what was found, and what changed. It is provided in the interest of full transparency ahead of the vote.

**1. Security and monitoring percentage corrected.** An earlier draft of this report stated that the security and monitoring category fell 4.5%. That figure included Gate Repairs, a grounds and infrastructure cost, grouped in with the security lines. With Gate Repairs correctly moved to Repairs & Infrastructure, the security and monitoring category falls 8.2%, and the two contracted services present in both years, Armour and Hawkeye, fall 9.4% on their own. See section 4 for the full explanation.

**2. Repairs & Infrastructure category re-based.** Because Gate Repairs moved into this category, its year-over-year change is now +57.3% rather than the +4% previously shown, and this is now explained in the report as deferred maintenance catch-up rather than a cost overrun.

**3. Combined salaries and security share of budget corrected.** Restated from 77.8% to 76.2% of the 2027 budget, consistent with the corrected category groupings above.

**4. Monthly cash-flow coverage corrected.** An earlier draft stated the proposed fee covers projected expenditure in ten months of twelve, naming January and December as the two months that run over. A third month, June ($490,180), also exceeds $480,000 of monthly income and had been missed. The report now correctly states nine months of twelve, with January, June, and December identified as the months requiring a reserve draw, and confirms the full-year position remains a $524,831 surplus.

**5. Escalation labels do not match the arithmetic on several lines.** The 2027 Expenditure Report prints a percentage beside several line items, apparently intended to show the increase applied. Testing each label against the two years' totals found meaningful discrepancies on the largest lines. This does not necessarily mean the underlying budget figures are wrong, but the labels as printed will not reconcile for an owner checking the arithmetic, and are worth correcting or annotating before the filing is finalised. The detail is set out in the table below.

**6. Generator fuel has no 2027 budget line.** The 2026 report carries $25,653 for generator fuel. The 2027 report carries a generator battery line of $25,272 but no corresponding fuel line. For a standby generator this may be an omission rather than a deliberate saving, and is worth confirming with the person who prepared the estimate.

**7. No building insurance line appears in either report.** For a sixteen-unit strata with common property, a shared pool, and a perimeter, the absence of a building insurance premium is worth confirming. If insurance is held and paid outside this expenditure report, a note to that effect would pre-empt an obvious owner question.

**8. Chemical and pool-supply categories were restructured between the two years.** The 2026 report carries a single combined Chemicals line of $68,328. The 2027 report splits this into three separate lines: Bleach, Chemicals-Plants, and Chlorine (Chlorine also existed separately in 2026). This report groups all of them together as Pool & Grounds Supplies in both years so that a fair comparison can be made; the two source reports, as filed, are not directly comparable line by line on this item.

**9. Minor transcription items in the source reports.** “Elecricity” is misspelled in the 2026 report. The Ground Duties escalation label in the 2027 report reads “13.5%%” with a duplicated percent sign. Four monthly Ground Duties figures in the 2026 report are shown in parentheses, which conventionally denotes a negative or credit figure, but they have been treated as ordinary positive costs in both the source total and this report, consistent with how the column totals were calculated. The 2026 electricity row sums to $552,064.20 against a stated total of $552,064.00, a two-cent rounding difference. None of these affect the totals used in this report, and they are noted here only so the source

documents can be tidied for the filing.

**10. The 2027 filing already assumes $30,000 of monthly income, ahead of the owners' vote.** The income line in the 2027 Estimated Expenditure Report is calculated at $30,000 per unit, the figure this report is recommending owners approve. Because that report is being filed with the Commission on the same basis, the committee may wish to note in the filing that the income figure is contingent on the resolution passing at the extraordinary general meeting.

### Escalation labels compared with the arithmetic

| Line item | Label printed in 2027 report | Actual year-over-year movement |
|---|---|---|
| Ground Duties | 13.5% | +27.0% |
| Administration | 14.50% | +20.2% |
| Security Services, Armour | 5% | -11.2% |
| Electricity | 5% | +2.6% |
| Water | 2% | +4.9% |
| **Whipper Repairs** | **10%** | **-54.4%** |

Three of these labels reconcile exactly at the level of the monthly rate rather than the annual total: Hawkeye's printed 10% matches its December 2026 monthly rate of $14,375 escalated to the $15,812.50 charged every month of 2027; Administration's 14.50% matches $21,000 escalated to $24,000; and Water's 2% matches the 2026 average monthly rate escalated to the rate charged from June 2027 onward. The Whipper Repairs 10% describes the step-up between successive 2027 repair events rather than a year-over-year change. The Armour line shows a 5% increase applied to a renegotiated, lower contract base rather than to the 2026 rate, which is the source of the committee's realised saving. The Ground Duties and Electricity labels do not reconcile to either the annual or the monthly figures on file and are recommended for review before the filing is finalised.
